Junior Full Stack Developer

(Node JS/React/Tailwind/PostgreSQL Eco System)

Professional Summary

Motivated and results-driven Junior Full Stack Software Developer with a strong foundation in modern web technologies, including Node.js, React, Tailwind CSS, and PostgreSQL. Proven ability to deliver secure, efficient, and user-focused solutions through collaborative and independent project development. Experienced in managing full project lifecycles, refactoring existing codebases, and optimizing team workflows. Known for innovative problem-solving, strong mentorship skills, and a commitment to continuous learning in the ever-evolving tech landscape.

Work Experience & Projects

Mantis Wrestling   **10/2024-1/2024**
- Built a site for a martial arts trainer to organize his coaching business and accept payments online, incentivize new clients with deals for memberships, and helped coordinate business and marketing strategies for maximum utility.
- Designed a section for the owner of the site to be able to manage and communicate with his clients, consolidating business related activities into one portal with role-based access control.

DevToday   **04/2024 - 07/2024**
- Built a comprehensive social media site that enables developers to collaborate, schedule meetups, record podcasts and play them while browsing through posts in topical groups.
- Using raw SQL, reduced query time by about 20x for complex queries versus using Prisma's default methods.

GitNote   **02/2024 - 04/2024**
- Built a personal productivity tool to capture workflows, components, and knowledge accrued on my development journey.
- Integrated OAuth with NextAuth for easy authentication flow, used dynamic routing to provide a user experience that makes collecting knowledge easy and enjoyable, and allows for easy tracking of progress.

Full-Stack Developer   **JavaScript Mastery 02/2024-04/2024**
- Architected and built a comprehensive social media site that enables developers to collaborate, schedule meetups, record podcasts and play them while browsing through posts in topical groups.
- Using NextJS, Prisma ORM, Supabase, Clerk for authentication, Tailwind, and ShadCN for styling, completed the project ahead of schedule working in a small team.

Full-Stack Developer   **Diam International 06/2022-12/2022**
- Built a new authentication system allowing external customers to access business data, enhancing security and user access.
- Programmatically configure time tracking software, improving payroll process efficiency, and productivity of team members.
- Independently maintained the company database and server, ensuring continuous and reliable service.

Project Manager / Web Developer Lead Intern   **Cowan Consulting LLC 01/2022 –01/2023**
- Refactored an incomplete project into a React Application, enhancing code quality and project viability.
- Trained and supervised 8-10 interns, fostering a collaborative learning environment and ensuring successful project handover.
- Took initiative to ensure new team members were adequately trained, improving overall project execution and continuity.

Education

- **BSc – Computer Programming and Information Systems**   Farmingdale University, NY   **Fall 2019 – Summer 2022**

Technologies, Languages, Soft Skills/Attributes

- Programming Languages – Typescript/JavaScript, SQL, PHP, C#
- Front End Development – React, NextJS, Tailwind CSS, ShadCN, Vue2+3
- Back End – PostgreSQL, Prisma ORM, Supabase, Vercel, Laravel/MySQL/PhpMyAdmin
- Tools and Frameworks. - NextJS, NuxtJS, Laravel, Azure, Git, VS Code/Community, Postman, GH Copilot, Figma
- Soft Skills – Leadership, Problem-Solving, Communication, Self Awareness, Humility, Team Oriented, intrinsically motivated
